EXPERIENCE

DATATHINK.IO

Rexburg, ID | 04/2025 – Present

Full Stack Engineer

- Develop and support an order management platform used by 115+ medical practices, handling 200+ orders each week with React, Python, FastAPI, and PostgreSQL
- Architecting and developing a full-stack web application and relational database to automate physician time tracking, procedure management, productivity reporting, and compensation calculations for a 180-provider anesthesiology group
- Interact directly with end users and stakeholders to define requirements, resolve high-impact production issues, and build features to improve ordering operations and patient management processes

DATATHINK.IO

Idaho, United States | 08/2024 – Present

Lead Data Analyst

- Develop and maintain analytics systems and dashboards to support operational and financial decision-making, including 5 custom internal dashboards embedded in core software
- Identify and resolve financial data discrepancies, uncovering and correcting thousands of dollars in reporting and compensation-related errors through in-depth analysis
- Design and maintain an ELT pipeline and centralized analytics database to automate data integration, reduce manual spreadsheet workflows, and enable scalable business intelligence reporting

AUSTIN AND MONICA

Remote | 09/2020 – 05/2024

Website & Graphic Designer

- Designed and developed websites and visual branding assets for clients, delivering responsive web experiences and cohesive graphic design across multiple projects

COURSES AND SPECIALIZATIONS

- Certificate in Data Analytics from Analyst Builder Bootcamp
- Course in Data Wrangling and Visualization from Datathink Development
- Certificate in Responsive Web Design from freeCodeCamp
- Course in React 18 + Typescript from Code with Mosh

EDUCATION

BRIGHAM YOUNG UNIVERSITY - IDAHO

Rexburg, ID | 2020
